Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statements (IDSs) received on November 2, 2004 and March 1, 2005 have been received, and the initialed copies (four pages) of the IDSs are attached with this correspondence.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by McAdam et al., McAdam hereinafter (US patent Publication number US 2004/0199559).

McAdam teaches a receiver having an adaptive filter comprising: receiving a signal having the transmitted signal including the channel characteristics of the transmitted signal $X[k]$ and impulse response $h[n]$, wherein the filter is adaptively trained according to the impulse response (see paragraph [0007]-[0009]; the adaptive filter having filter coefficients for filtering the received signal using a subset of the calculated coefficients (see paragraph [0056], [0066] and claims 17 and 31) as in claims 1 and 2.

Art Unit: 2611

The adaptive filter learns adaptively filtering from the impulse response of the received signal (see paragraph [0009]) and inherently detects or measures the characteristics of the channel.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 7,103,177 issued to Tanrikulu et al. discloses an adaptive filter using a subset of the calculated coefficients to filter the received signal.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tesfaldet Bocure whose telephone number is (571) 272-3015. The examiner can normally be reached on Mon-Thur (7:30a-5:00p) & Mon.-Fri (7:30a-5:00p).
